Report on Internal Control Over Financial Reporting

The Association's principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Association's Consolidated Financial Statements. For purposes of this report, "internal control over financial reporting" is defined as a process designed by, or under the supervision of the Association's principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel. This process provides reasonable assurance regarding the reliability of financial reporting information and the preparation of the Consolidated Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Association's assets that could have a material effect on its Consolidated Financial Statements.

The Association's management has completed an assessment of the effectiveness of internal control over financial reporting as of September 30, 2014. In making the assessment, management used the framework in *Internal Control — Integrated Framework*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the "COSO" criteria.

Based on the assessment performed, the Association concluded that as of September 30, 2014, the internal control over financial reporting was effective based upon the COSO (1992) criteria. Additionally, based on this assessment, the Association determined that there were no material weaknesses in the internal control over financial reporting as of September 30, 2014.

Farm Credit of Central Florida, ACA

Management's Discussion and Analysis of Financial Condition and Results of Operations

(dollars in thousands)

The following commentary reviews the financial condition and results of operations of Farm Credit of Central Florida, ACA, (Association) for the period ended September 30, 2014. These comments should be read in conjunction with the accompanying financial statements, notes to the financial statements and the 2013 Annual Report of the Association. The accompanying consolidated financial statements were prepared under the oversight of the Audit Committee of the Board of Directors.

LOAN PORTFOLIO

The Association provides funds to farmers, rural homeowners and farm-related businesses for financing of short and intermediate-term loans and long-term real estate mortgage loans. The Association's loan portfolio is diversified over a range of agricultural commodities in our region, including horticulture, fruits/vegetables, citrus, and cattle. Farm size varies and many of the borrowers in the region have diversified farming operations. This factor, along with the numerous opportunities for non-farm income in the area, reduces the level of dependency on a given commodity.

September 30, 2014 compared to December 31, 2013

Loan volume of the Association as of September 30, 2014, was $368,818, a decrease of $6,146 as compared to $374,964 at December 31, 2013. Net loans outstanding at September 30, 2014, were $361,498 as compared to $366,869 at December 31, 2013. The Association has investment securities that are classified as held to maturity in the amount of $33,927 at September 30, 2014, as compared to $39,511 at December 31, 2013. Net loans and investment securities accounted for 95.87 percent of total assets at September 30, 2014, as compared to 93.90 percent of total assets at December 31, 2013.

The Association's total servicing portfolio has increased to $873,644 as compared to $872,008 at December 31, 2013, due in large part to new money closings exceeding run-off and liquidations. Even with the decrease in nonaccrual assets and investments, servicing volume has maintained positive growth throughout the period. The decrease in net loan volume is primarily due to seasonal lending. The short-term portfolio, which is heavily influenced by operating loans, normally reaches a peak balance between October and December and declines between January and June as strawberry and other winter vegetable growers pay down their loans using proceeds from the sale of their crops. The result of this normal seasonal lending activity causes net loan volume to decrease on revolving credit lines.

September 30, 2014 compared to September 30, 2013

Loan volume of the Association as of September 30, 2014, was $368,818, an increase of $11,003 as compared to $357,815 at September 30, 2013. Net loans outstanding at September 30, 2014, were $361,498 as compared to $349,478 at September 30, 2013. The Association has investment securities that are classified as held to maturity in the amount of $33,927 at September 30, 2014, as compared to $41,379 at September 30, 2013. Net loans and investment securities accounted for 95.87 percent of total assets at September 30, 2014, as compared to 95.27 percent of total assets at September 30, 2013.

The Association's total servicing portfolio has increased to $873,644 as compared to $862,410 at September 30, 2013, due to new money closings exceeding run-off and or liquidations. Even with a decrease in nonaccrual assets and investments, servicing volume has maintained positive growth throughout the year.

ASSET QUALITY AND LOAN LOSS RESERVES

There is an inherent risk in the extension of any type of credit. Portfolio credit quality has improved as compared to year end as a result of recent reductions in Substandard-Viable assets. Acceptable and OAEM credit quality as a percentage of total loan portfolio was 91.40% as of September 30, 2014, compared to 88.90% at December 31, 2013 and 87.64% at September 30, 2013. Substandard credit quality was 8.60% as of September 30, 2014, compared to 11.10% at December 31, 2013. The actual substandard asset volume has been reduced by $11,679 from year-end December 31, 2013. Nonaccrual loan volume was $8,810 at September 30, 2014, compared to $8,157 at December 31, 2013 and $10,027 at September 30, 2013, an increase of $653 and a decrease of $1,217, respectively. The majority of the loan assets in nonaccrual are in the nursery, citrus and cattle industries.

Association management maintains an allowance for loan losses in an amount considered sufficient to absorb possible losses in the loan portfolio based on current and expected future conditions. The allowance for loan losses at September 30, 2014, was $7,320 compared to $8,095 at December 31, 2013, and $8,337 at September 30, 2013, and is considered by management to be adequate to cover possible losses. The allowance for loan loss is broken down between specific reserves assigned to an individual loan and general reserves which are available for the possible

losses within the entire portfolio. The current allowance for loan loss at September 30, 2014, contains $3,824 in specific reserves and $3,496 in general reserves. The following outlines the allowance for loan loss activity as of September 30, 2014.

Allowance for Loan Losses Activity:	YTD 2014
Balance at beginning of period	$ 8,095
Charge-offs	(502)
Recoveries	187
Provisions/(Reversals)-General	(244)
Provisions/(Reversals)–Specifics	(216)
Balance at end of period	$ 7,320

The decrease in allowance for loan losses compared to December 2013 was a direct result of allowance reversals and charge-offs during 2014 within the citrus, cattle and real estate portfolios. The reversals are due to improved asset quality since December 2013. Chargeoffs are funded through the allowance from previous and/or current increases in the provision for loan losses.

RESULTS OF OPERATIONS

For the three months ended September 30, 2014

Net income for the three months ended September 30, 2014, totaled $1,653, as compared to $2,453 for the same period in 2013. The decrease of $800 for the period is associated directly with the decreased loan fees and decreased patronage refunds from other Farm Credit institutions.

Net interest income decreased $26 for the three months ended September 30, 2014, as compared to the same period in 2013. The primary reason for the decrease in net interest income is the decrease in interest rate spreads as compared to the same time last year. Net interest income for the three months ending September 30, 2014, is shown in the following table:

	For the three months ended September 30,			
Net Interest Income	**2014**	**2013**	**$ change**	**% change**
Investment Interest Income	$ 190	$ 194	$ (4)	(2.06) %
Loan Interest Income	4,044	4,068	(24)	(0.59)
Total Interest Income	4,234	4,262	(28)	(0.66)
Total Interest Expense	1,555	1,557	(2)	(0.13)
Net Interest Income	$ 2,679	$ 2,705	$ (26)	(0.96) %

Allowance for loan loss activity for the quarter consisted of no provision or reversal, as compared to a $180 reversal for the same period last year. Provisions for loan losses for the three months ending September 30, 2014 are shown in the following table:

	For the three months ended September 30,			
Provisions/(Reversals) for Loan Losses	**2014**	**2013**	**$ change**	**% change**
General Reserves	$ 242	$ 62	$ 180	290.32%
Specific Reserves	(242)	(242)	–	–
Total Provisions/(Reversals)	$ –	$ (180)	$ 180	100.00%

Noninterest income for the three months ended September 30, 2014, totaled $1,309, as compared to $1,887 for the same period of 2013, a decrease of $578. The decrease is primarily the result of fewer loan fees collected as well as decreased patronage refunds from other Farm Credit institutions. Loan fees decreased from the same period last year due to fewer fees collected on purchased loans as well as large fees generated on lines of credit renewals in 2013 that were not up for renewal in 2014. Patronage refunds from other Farm Credit institutions decreased from the prior year due to lower patronage earnings from the Capitalized Participation Pools as a result of decrease loan volume within the pool. Noninterest income for the three months ending September 30, 2014, is shown in the following table:

	For the three months ended September 30,			
Noninterest Income	**2014**	**2013**	**$ change**	**% change**
Loan fees	$ 109	$ 159	$ (50)	(31.45)%
Fees for financially related services	47	43	4	9.30
Patronage refunds from other Farm Credit Institutions	1,106	1,640	(534)	(32.56)
Gains (losses) on sales of rural home loans, net	43	46	(3)	(6.52)
Gains (losses) on other transactions	4	–	4	100.00
Other noninterest income	–	(1)	1	100.00
Total noninterest income	$ 1,309	$ 1,887	$ (578)	(30.63)%

Noninterest expense for the three months ended September 30, 2014, increased $16 compared to the same period of 2013. The Association booked a $229 gain on other property owned as opposed to a $22 gain during the same period in 2013. The gain on sale of other property owned offsets increases in salary and employee benefits, other operating expenses and insurance fund premiums from the same period last year. Salary and employee benefits increased 8.28% due to an increase in employees since the same period last year as well as increased health insurance and retirement costs. Other operating expenses increased $73 or 15.40% as a result of expenses on nonaccrual loans being expensed as an operating expense during the whole period as compared to the nonaccrual charges being added back to the actual loan balance until August of 2013. Insurance Fund Premium expenses increased due to higher loan volumes coupled with an increase in the premium rate which result in higher premium expenses. The Farm Credit System Insurance Corporation (FCSIC) has set the premium to 12 basis points (compared to 10 basis points during 2013) on adjusted insured debt outstanding with an additional 10 basis point premium on the average principal outstanding of nonaccrual loans. Noninterest

expense for the three months ending September 30, 2014 is shown in the following table:

	For the three months ended September 30,			
Noninterest Expense	2014	2013	$ change	% change
Salary and employee benefits	$ 1,778	$ 1,642	$ 136	8.28 %
Occupancy and equipment	153	153	–	–
Insurance Fund Premium	86	72	14	19.44
(Gains) losses on other property owned, net	(229)	(22)	(207)	940.91
Other operating expenses	547	474	73	15.40
Total noninterest expense	$ 2,335	$ 2,319	$ 16	0.69 %

For the nine months ended September 30, 2014

Net income for the nine months ended September 30, 2014, totaled $5,783 as compared to $6,879 for the same period in 2013. The decrease of $1,096 for the period is associated with decreased non interest income from the same period prior year.

Net interest income increased $140 or 1.73% for the nine months ended September 30, 2014, as compared to the same period in 2013. The primary reason for the increase in net interest income is the increase in net loan assets as compared to the same time last year. Net interest income for the nine months ending September 30, 2014 is shown in the following table:

	For the nine months ended September 30,			
Net Interest Income	2014	2013	$ change	% change
Investment Interest Income	$ 563	$ 652	$ (89)	(13.65)%
Loan Interest Income	12,389	12,139	250	2.06
Total Interest Income	12,952	12,791	161	1.26
Total Interest Expense	4,710	4,689	21	0.45
Net Interest Income	$ 8,242	$ 8,102	$ 140	1.73%

The effects of changes in average volume and interest rates on net interest income over the past nine months are presented in the following table:

Change in Net Interest Income:

	Volume	Rate	Non-accrual	Amortization	Total
	(dollars in thousands)				
Change in NII	$ 185	$ (244)	77	$ 122	$ 140

Allowance for loan loss activity consisted of a $460 reversal, as compared to a $747 reversal for the same period last year. The reversal was due mostly to the decrease in nonaccrual loan volumes coupled with improved credit quality. Provisions for loan losses for the nine months ending September 30, 2013 are shown in the following table:

	For the nine months ended September 30,			
Provisions for Loan Losses	2014	2013	$ change	% change
General Reserves	$ (244)	$ (936)	$ 692	73.93%
Specific Reserves	(216)	189	(405)	(214.29)
Total Provisions/(Reversals)	$ (460)	$ (747)	$ 287	38.42%

Noninterest income for the nine months ended September 30, 2014, totaled $4,158, as compared to $5,313 for the same period of 2013, a decrease of $1,155. The decrease is primarily the result of decreased loan fees as well as decreased patronage refunds from other Farm Credit Institutions. Loan fees decreased from the same period last year due to fewer fees collected on purchased loans as well as large fees generated on lines of credit renewals in 2013 that were not up for renewal in 2014. Patronage refunds from other Farm Credit Institutions decreased from the prior year due to lower patronage earnings from the Capitalized Participation Pools (CPP) as a result of decreased loan volume within the pool. The Association also received a $257 special patronage payment from AgFirst during the second quarter of 2013, as compared to no special distribution 2014. Noninterest income for the nine months ending September 30, 2014 is shown in the following table:

	For the nine months ended September 30,			
Noninterest Income	2014	2013	$ change	% change
Loan fees	$ 230	$ 523	$ (293)	(56.02)%
Fees for financially related services	92	104	(12)	(11.54)
Patronage refunds from other Farm Credit institutions	3,703	4,510	(807)	(17.89)
Gains (losses) on sales of rural home loans, net	77	113	(36)	(31.86)
Gains (losses) on other transactions	13	7	6	85.71
Other noninterest income	43	56	(13)	(23.21)
Total noninterest income	$ 4,158	$ 5,313	$ (1,155)	(21.74)%

Noninterest expense for the nine months ended September 30, 2014, decreased $208 compared to the same period of 2013. The primary reason for the decrease was due to a $434 gain on sale of other property owned as opposed to a $399 loss in the same period last year. This gain offsets increases to salary and employee benefits, other operating expenses and insurance fund premiums. Salaries and employee benefits increased $350 during the period due to an increase in employees since the same period last year. Increases of $99 for health insurance and $76 for retirement costs also contributed to the increase in salaries and employee benefits. Other operating expenses increased $238 from the same period last year as a result of expenses on nonaccrual loans being expensed as an operating expense during the entire period as compared to the nonaccrual charges being added back to the actual loan balance until August 2013. Insurance Fund Premium expenses increased due to the Farm Credit System Insurance Corporation (FCSIC) adjusting the

premium to 12 basis points (compared to 10 basis points during 2013) on adjusted insured debt outstanding with an additional 10 basis point premium on the average principal outstanding of nonaccrual loans. Noninterest expense for the nine months ending September 30, 2014 is shown in the following table:

	For the nine months ended September 30,			
Noninterest Expense	2014	2013	$ change	% change
Salary and employee benefits	$ 5,224	$ 4,874	$ 350	7.18%
Occupancy and equipment	468	473	(5)	(1.06)
Insurance Fund Premium	258	216	42	19.44
(Gains) losses on other property owned, net	(434)	399	(833)	(208.77)
Other operating expenses	1,559	1,321	238	18.02
Total noninterest expense	$ 7,075	$ 7,283	$ (208)	(2.86)%

FUNDING SOURCES

The principal source of funds for the Association is the borrowing relationship established with the Bank through a General Financing Agreement. The General Financing Agreement utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. The funds are advanced by the Bank to the Association in the form of notes payable. The notes payable are segmented into variable rate and fixed rate sections. The variable rate note is utilized by the Association to fund variable rate loan advances and operating funds requirements. The fixed rate note is used specifically to fund fixed rate loan advances made by the Association. The total notes payable to the Bank at September 30, 2014, was $319,517 as compared to $337,140 at December 31, 2013. The decrease is attributable to pay downs on loans received during the normal course of business being greater than borrowings to fund new loan advances.

CAPITAL RESOURCES

Total members' equity at September 30, 2014, increased to $86,772 from the December 31, 2013, total of $84,417. The increase is primarily attributed to the increase in unallocated surplus resulting from net income.

Total capital stock and participation certificates were $870 on September 30, 2014, compared to $902 on December 31, 2013. This decrease is attributed to the retirement of stock and participation certificates on loans liquidated in the normal course of business.

Farm Credit Administration regulations require all Farm Credit institutions to maintain minimum permanent capital, total surplus and core surplus ratios. These ratios are calculated by dividing the Association's permanent capital, total surplus and core surplus as defined in FCA regulations, by a risk-adjusted asset base. As of September 30, 2014, the Association's total surplus ratio and core surplus ratio were 21.37 percent and 18.32 percent, respectively, and the permanent capital ratio was 21.61 percent. All three ratios were well above the minimum regulatory ratios of 7.00 percent for permanent capital and total surplus ratios and 3.50 percent for the core surplus ratio.

REGULATORY MATTERS

On March 31, 2014, the FCA published an interim final rule rescinding all requirements for nonbinding advisory votes on senior officer compensation at System banks and associations. The comment period for the interim rule ended on April 30, 2014 and the final rule became effective on June 18, 2014.

On July 25, 2014, the FCA published a proposed rule in the Federal Register to revise the requirements governing the eligibility of investments for System banks and associations. The public comment period ended on October 23, 2014. The stated objectives of the proposed rule are as follows:

- To strengthen the safety and soundness of System banks and associations.
- To ensure that System banks hold sufficient liquidity to continue operations and pay maturing obligations in the event of market disruption.
- To enhance the ability of the System banks to supply credit to agricultural and aquatic producers.
- To comply with the requirements of section 939A of the Dodd-Frank Act.
- To modernize the investment eligibility criteria for System banks.
- To revise the investment regulation for System associations to improve their investment management practices so they are more resilient to risk.

On September 4, 2014, the FCA published a proposed rule in the Federal Register to modify the regulatory capital requirements for System banks and associations. The public comment period ends on January 2, 2015. The stated objectives of the proposed rule are as follows:

- To modernize capital requirements while ensuring that institutions continue to hold sufficient regulatory capital to fulfill their mission as a government-sponsored enterprise.
- To ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted, but also to ensure that the rules recognize the cooperative structure and the organization of the System.
- To make System regulatory capital requirements more transparent.
- To meet the requirements of section 939A of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Please refer to Note 1, *"Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements"*, in the Notes to the Financial Statements, and the 2013 Annual Report to Shareholders for recently issued accounting pronouncements.

NOTE: Shareholder investment in the Association is materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst's annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2832, or writing Susanne Caughman, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Information concerning AgFirst Farm Credit Bank can also be obtained at their website, *www.agfirst.com*. Copies of the Association's annual and quarterly reports are also available upon request free of charge by calling 1-800-533-2773, or writing D. Scott Fontenot, CFO, Farm Credit of Central Florida, ACA, P.O. Box 8009, Lakeland, FL 33802, or accessing the website, *www.farmcreditcfl.com.* The Association prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

(unaudited)

Note 1 — Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements

Organization

The accompanying financial statements include the accounts of Farm Credit of Central Florida, ACA (the Association). A description of the organization and operations, the significant accounting policies followed, and the financial condition and results of operations for the Association as of and for the year ended December 31, 2013, are contained in the 2013 Annual Report to Shareholders. These unaudited interim consolidated financial statements should be read in conjunction with the latest Annual Report to Shareholders.

Basis of Presentation

In the opinion of management, the accompanying consolidated financial statements contain all adjustments necessary for a fair presentation of the interim financial condition and results of operations and conform with generally accepted accounting principles (GAAP) and prevailing practices within the banking industry.

Certain amounts in the prior period's consolidated financial statements may have been reclassified to conform to the current period presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The results of any interim period are not necessarily indicative of the results to be expected for a full year.

Significant Accounting Policies

The Association maintains an allowance for loan losses at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio as of the report date. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through loan charge-offs and allowance reversals. A review of individual loans in each respective portfolio is performed periodically to determine the appropriateness of risk ratings and to ensure loss exposure to the Association has been identified.

Recently Issued Accounting Pronouncements

In August 2014, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2014-15, "Presentation of Financial Statements—Going Concern (Subtopic 205-40): Disclosure of Uncertainties about an Entity's Ability to Continue as a Going Concern." The Update is intended to define management's responsibility to evaluate whether there is substantial doubt about an organization's ability to continue as a going concern and to provide related footnote disclosures. Under Generally Accepted Accounting Principles (GAAP), financial statements are prepared under the presumption that the reporting organization will continue to operate as a going concern, except in limited circumstances. Financial reporting under this presumption is commonly referred to as the going concern basis of accounting. The going concern basis of accounting is critical to financial reporting because it establishes the fundamental basis for measuring and classifying assets and liabilities. Currently, GAAP lacks guidance about management's responsibility to evaluate whether there is substantial doubt about the organization's ability to continue as a going concern or to provide related footnote disclosures. The Update provides guidance to an organization's management, with principles and definitions that are intended to reduce diversity in the timing and content of disclosures that are commonly provided by organizations today in the financial statement footnotes. The amendments in this Update apply to all companies and not-for-profit organizations and become effective in the annual period ending after December 15, 2016, with early application permitted.

In August 2014, the FASB issued ASU 2014-14, "Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40): Classification of Certain Government-Guaranteed Mortgage Loans upon Foreclosure." Currently, there is diversity in practice related to how creditors classify certain government-guaranteed mortgage loans upon foreclosure. The amendments in this Update require that a mortgage loan be derecognized and that a separate other receivable be recognized upon foreclosure if the following conditions are met: 1. The loan has a government guarantee that is not separable from the loan before foreclosure; 2. At the time of foreclosure, the creditor has the intent to convey the real estate property to the guarantor and make a claim on the guarantee, and the creditor has the ability to recover under that claim; 3. At the time of foreclosure, any amount of the claim that is determined on the basis of the fair value of the real estate is fixed. Upon foreclosure, the separate other receivable should be measured based on the amount of the loan balance (principal and interest) expected to be recovered from the guarantor. The amendments in this Update are effective for public business entities for annual periods, and interim periods within those annual periods, beginning after December 15, 2014. For all other entities, the amendments in this Update are effective for annual periods ending after December 15, 2015, and interim periods beginning after December 15, 2015.

In June 2014, the FASB issued ASU 2014-11, "Transfers and Servicing (Topic 860): Repurchase-to-Maturity Transactions, Repurchase Financings, and Disclosures," which changes the accounting for repurchase-to-maturity transactions and repurchase financing arrangements. It also requires enhanced disclosures about repurchase agreements and other similar transactions. The new guidance aligns the accounting for repurchase-to-maturity transactions and repurchase agreements executed as a repurchase financing with the accounting for other typical repurchase agreements such that, these transactions would all be accounted for as secured borrowings. The accounting changes in this Update are effective for public companies for the first interim or annual period beginning after December 15, 2014. In addition, for public companies, the disclosure for certain transactions accounted for as a sale is effective for the first interim or annual period beginning on or after December 15, 2014, and the disclosure for transactions accounted for as secured borrowings is required to be presented for annual periods beginning after December 15, 2014, and interim periods beginning after March 15, 2015. For all other entities, all changes are effective for annual periods beginning after December 15, 2014, and interim periods beginning after December 15, 2015. Earlier application for a public company is prohibited, but all other companies and organizations may elect to apply the requirements for interim periods beginning after December 15, 2014.

In May 2014, the FASB, responsible for U.S. Generally Accepted Accounting Principles (U.S. GAAP), and the International Accounting Standards Board (IASB), responsible for International Financial Reporting Standards (IFRS), jointly issued converged standards on the recognition of revenue from contracts with customers. ASU 2014-09, "Revenue from Contracts with Customers (Topic 606)" and IFRS 15 "Revenue from Contracts with Customers" are intended to improve the financial reporting of revenue and comparability of the top line in financial statements globally and supersede substantially all previous revenue recognition guidance. The core principle of the new standards is for companies to recognize revenue to depict the transfer of goods or services to customers in amounts that reflect the consideration (that is, payment) to which the company expects to be entitled in exchange for those goods or services. The new standard also will result in enhanced disclosures about revenue, provide guidance for transactions that were not previously addressed comprehensively (for example, service revenue and contract modifications) and improve guidance for multiple-element arrangements. Because of the pervasive nature of the new guidance, the boards have established a joint transition resource group in order to aid transition to the new standard. For public entities reporting under U.S. GAAP, the amendments in the Update are effective for annual reporting periods beginning after December 15, 2016, including interim periods within that reporting period. Early application is not permitted. For nonpublic entities, the amendments are effective for annual reporting periods beginning after December 15, 2017, and interim periods within annual periods beginning after December 15, 2018. A nonpublic entity may elect to adopt this guidance earlier under certain circumstances. The amendments are to be applied retrospectively. The Association has identified ancillary revenues that will be subject to this guidance. However, because financial instruments are not within the scope of the guidance, it is expected that adoption will not have a material impact on the Association's financial condition or results of operations, but may result in additional disclosures.

In April 2014, the FASB issued ASU 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity." The amendments in this Update change the requirements for reporting discontinued operations in Subtopic 205-20. A discontinued operation may include a component of an entity or a group of components of an entity, or a business or nonprofit activity. A disposal of a component of an entity or a group of components of an entity is required to be reported in discontinued operations only if the disposal represents a strategic shift that has (or will have) a major effect on an entity's operations and financial results. A public business entity and a not-for-profit entity that has issued, or is a conduit bond obligor for, securities that are traded, listed, or quoted on an exchange or an over-the-counter market should apply the amendments in this Update prospectively to both of the following: (1) All disposals (or classifications as held for sale) of components of an entity that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years and (2) All businesses or nonprofit activities that, on acquisition, are classified as held for sale that occur within annual periods beginning on or after December 15, 2014, and interim periods within those years.

In March 2014, the FASB issued ASU 2014-06, "Technical Corrections and Improvements Related to Glossary Terms (Master Glossary)." The amendments in this Update relate to glossary terms, cover a wide range of Topics in the Codification and are presented in four sections: Deletion of Master Glossary Terms, Addition of Master Glossary Term Links, Duplicate Master Glossary Terms, and Other Technical Corrections Related to Glossary Terms. These amendments did not have transition guidance and were effective upon issuance for both public entities and nonpublic entities.

In January 2014, the FASB issued ASU 2014-04, "Receivables—Troubled Debt Restructurings by Creditors (Subtopic 310-40) - Reclassification of Residential Real Estate Collateralized Consumer Mortgage Loans upon Foreclosure." The objective of the amendments in this Update is to reduce diversity by clarifying when an in substance repossession or foreclosure occurs, that is, when a creditor should be considered to have received physical possession of residential real estate property collateralizing a consumer mortgage loan such that the loan receivable should be derecognized and the real estate property recognized. The amendments are effective for public business entities for annual periods, and interim periods within

those annual periods, beginning after December 15, 2014. For entities other than public business entities, the amendments in this Update are effective for annual periods beginning after December 15, 2014, and interim periods within annual periods beginning after December 15, 2015. An entity can elect to adopt the amendments in this Update using either a modified retrospective transition method or a prospective transition method. Early adoption is permitted.

Other recently issued accounting pronouncements are discussed in the 2013 Annual Report to Shareholders.

Note 2 — Loans and Allowance for Loan Losses

For a complete description of the Association's accounting for loans (including impaired loans and the allowance for loan losses) and definitions of loan types, see the 2013 Annual Report to Shareholders.

Credit risk arises from the potential inability of an obligor to meet its repayment obligation. The Association manages credit risk associated with lending activities through an assessment of the credit risk profile of an individual obligor. The Association sets its own underwriting standards and lending policies that provide direction to loan officers and are approved by the board of directors.

A summary of loans outstanding at period end follows:

	September 30, 2014	December 31, 2013
Real estate mortgage	$ 160,502	$ 153,346
Production and intermediate-term	143,999	160,984
Loans to cooperatives	7,193	8,020
Processing and marketing	31,189	26,174
Farm-related business	10,055	9,169
Communication	1,317	734
Energy and water/waste disposal	1,909	2,204
Rural residential real estate	12,654	14,333
Total Loans	$ 368,818	$ 374,964

A substantial portion of the Association's lending activities is collateralized, and exposure to credit loss associated with lending activities is reduced accordingly.

The Association may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with Farm Credit Administration (FCA) regulations. The following tables present participation loan balances at periods ended:

	September 30, 2014

**Includes the loan types; Loans to cooperatives, Processing and marketing, and Farm-related business.*

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. The following tables present additional information about pre-modification and post-modification outstanding recorded investment and the effects of the modifications that occurred during the periods presented.

	Three months ended September 30, 2014				
	Interest Concessions	Principal Concessions	Other Concessions	Total	Charge-offs
Pre-modification Outstanding Recorded Investment					
Real estate mortgage	$ –	$ 107	$ –	$ 107	
Production and intermediate-term	–	1,129	–	1,129	
Total	$ –	$ 1,236	$ –	$ 1,236	
Post-modification Outstanding Recorded Investment					
Real estate mortgage	$ –	$ 107	$ –	$ 107	$ –
Production and intermediate-term	–	1,129	–	1,129	–
Total	$ –	$ 1,236	$ –	$ 1,236	$ –

Nine months ended September 30, 2014	Interest Concessions	Principal Concessions	Other Concessions	Total	Charge-offs
Pre-modification Outstanding Recorded Investment					
Real estate mortgage	$ –	$ 107	$ –	$ 107	
Production and intermediate-term	–	1,129	–	1,129	
Total	$ –	$ 1,236	$ –	$ 1,236	
Post-modification Outstanding Recorded Investment					
Real estate mortgage	$ –	$ 107	$ –	$ 107	$ –
Production and intermediate-term	–	1,129	–	1,129	–
Total	$ –	$ 1,236	$ –	$ 1,236	$ –

Three months ended September 30, 2013	Interest Concessions	Principal Concessions	Other Concessions	Total	Charge-offs
Pre-modification Outstanding Recorded Investment					
Real estate mortgage	$ 78	$ 1,030	$ –	$ 1,108	
Production and intermediate-term	–	1,573	100	1,673	
Rural residential real estate	202	–	–	202	
Total	$ 280	$ 2,603	$ 100	$ 2,983	
Post-modification Outstanding Recorded Investment					
Real estate mortgage	$ 82	$ 1,060	$ –	$ 1,142	$ –
Production and intermediate-term	–	1,574	100	1,674	–
Rural residential real estate	202	–	–	202	–
Total	$ 284	$ 2,634	$ 100	$ 3,018	$ –

Nine months ended September 30, 2013	Interest Concessions	Principal Concessions	Other Concessions	Total	Charge-offs
Pre-modification Outstanding Recorded Investment					
Real estate mortgage	$ 78	$ 1,167	$ 649	$ 1,894	
Production and intermediate-term	–	3,446	100	3,546	
Rural residential real estate	202	–	–	202	
Total	$ 280	$ 4,613	$ 749	$ 5,642	
Post-modification Outstanding Recorded Investment					
Real estate mortgage	$ 82	$ 1,198	$ 647	$ 1,927	$ –
Production and intermediate-term	–	3,462	100	3,562	(887)
Rural residential real estate	202	–	–	202	–
Total	$ 284	$ 4,660	$ 747	$ 5,691	$ (887)

Interest concessions may include interest forgiveness and interest deferment. Principal concessions may include principal forgiveness, principal deferment, and maturity extension. Other concessions may include additional compensation received which might be in the form of cash or other assets.

There were no TDRs that occurred during the previous twelve months and for which there was a subsequent payment default during the periods presented. Payment default is defined as a payment that was thirty days or more past due.

The following table provides information at period end on outstanding loans restructured in troubled debt restructurings. These loans are included as impaired loans in the impaired loan table:

	Total TDRs		Nonaccrual TDRs	
	September 30, 2014	December 31, 2013	September 30, 2014	December 31, 2013
Real estate mortgage	$ 9,742	$ 10,375	$ 2,724	$ 3,012
Production and intermediate-term	8,643	9,316	2,073	2,255
Rural residential real estate	1,363	1,376	666	176
Total Loans	$ 19,748	$ 21,067	$ 5,463	$ 5,443
Additional commitments to lend	$ –	$ –		

Note 3 — Investment Securities

The Association's investments consist primarily of asset-backed securities (ABSs). These ABSs are issued through the Small Business Administration and are guaranteed by the full faith and credit of the United States government. They are held for managing short-term surplus funds and reducing interest rate risk. These securities meet the applicable FCA regulatory guidelines related to government agency guaranteed investments.

A summary of the amortized cost and fair value of investment securities held-to-maturity follows:

	September 30, 2014				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield
Asset-backed securities	$ 33,927	$ 787	$ (39)	$ 34,675	2.20%

	December 31, 2013				
	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield
Asset-backed securities	$ 39,511	$ 954	$ (48)	$ 40,417	2.07%

A summary of the contractual maturity, amortized cost and estimated fair value of investment securities held-to-maturity follows:

	September 30, 2014		
	Amortized Cost	Fair Value	Weighted Average Yield
In one year or less	$ 689	$ 699	7.69%
After one year through five years	23,412	23,873	2.10
After five years through ten years	4,004	4,074	1.96
After ten years	5,822	6,029	2.08
Total	$ 33,927	$ 34,675	2.20%

A portion of these investments has contractual maturities in excess of ten years. However, expected maturities for these types of securities can differ from contractual maturities because borrowers may have the right to prepay obligations with or without prepayment penalties.

An investment is considered impaired if its fair value is less than its cost. The following tables show the fair value and gross unrealized losses for investments that were in a continuous unrealized loss position aggregated by investment category at each reporting period. A continuous unrealized loss position for an investment is measured from the date the impairment was first identified.

	September 30, 2014			
	Less than 12 Months		12 Months or Greater	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Asset-backed securities	$ 560	$ (1)	$ 1,658	$ (38)

	December 31, 2013			
	Less than 12 Months		12 Months or Greater	
	Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
Asset-backed securities	$ 932	$ (11)	$ 1,231	$ (37)

FASB guidance contemplates numerous factors in determining whether an impairment is other-than-temporary. These factors include: (1) whether or not management intends to sell the security, (2) whether it is more likely than not that management would be required to sell the security before recovering its costs, and (3) whether management expects to recover the security's entire amortized cost basis (even if there is no intention to sell). If the Association intends to sell the security or it is more likely than not that it would be required to sell the security, the impairment loss equals the full difference between amortized cost and fair value of the security. When the Association does not intend to sell securities in an unrealized loss position and it is not more likely than not that it would be required to sell the securities, other-than-temporary impairment loss is separated into credit loss and non-credit loss. Credit loss is defined as the shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis.

The Association performs periodic credit reviews, including other-than-temporary impairment analyses, on its investment securities portfolio. The objective is to quantify future possible loss of principal or interest due on securities in the portfolio. Factors considered in determining whether an impairment is other-than-temporary include among others: (1) the length of time and the extent to which the fair value is less than cost, (2) adverse conditions specifically related to the industry, (3) geographic area and the condition of the underlying collateral, (4) payment structure of the security, (5) ratings by rating agencies, (6) the credit worthiness of bond insurers, and (7) volatility of the fair value changes.

The Association uses the present value of cash flows expected to be collected from each debt security to determine the amount of credit loss. This technique requires assumptions related to the underlying collateral, including default rates, amount and timing of prepayments, and loss severity. Assumptions can vary widely from security to security and are influenced by such factors as loan interest rate, geographical location of the borrower, borrower characteristics, and collateral type.

Significant inputs used to estimate the amount of credit loss include, but are not limited to, performance indicators of the underlying assets in the security (including default rates, delinquency rates, and percentage of nonperforming assets), loan-to-collateral value ratios, third-party guarantees, current levels of subordination, vintage, geographic concentration, and credit ratings. The Association may obtain assumptions for the default rate, prepayment rate, and loss severity rate from an independent third party, or generate the assumptions internally.

The Association has not recognized any credit losses as any impairments were deemed temporary and resulted from non-credit related factors. The Association has the ability and intent to hold these temporarily impaired investments until a recovery of unrealized losses occurs, which may be at maturity, and at this time expects to collect the full principal amount and interest due on these securities, especially after considering credit enhancements.

Substantially all of these investments were in U. S. government agency securities and the Association expects these securities would not be settled at a price less than their amortized cost. All securities continue to perform at period end.

Investments in other Farm Credit Institutions

The Association is required to maintain ownership in the Bank of Class B and Class C stock as determined by the Bank. The Bank may require additional capital contributions to maintain its capital requirements. The Association owns 2.65 percent of the issued stock of the Bank as of September 30, 2014 net of any reciprocal investment. As of that date, the Bank's assets totaled $29.0 billion and shareholders' equity totaled $2.4 billion. The Bank's earnings were $282 million for the first nine months of 2014. In addition, the Association has an investment of $308 related to other Farm Credit institutions.

Note 4 — Debt

Notes Payable to AgFirst Farm Credit Bank

The Association's indebtedness to AgFirst Farm Credit Bank (AgFirst or the Bank) represents borrowings by the Association primarily to fund its loan portfolio. This indebtedness is collateralized by a pledge of substantially all of the Association's assets. The contractual terms of the revolving line of credit are contained in the General Financing Agreement (GFA). The GFA also defines Association performance criteria for borrowing from the Bank, which includes borrowing base margin, earnings and capital covenants, among others.

Note 5 — Members' Equity

Accumulated Other Comprehensive Income (AOCI)

The following tables present activity related to AOCI for periods presented:

Changes in Accumulated Other Comprehensive income by Component *(a)*

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2014	**2013**	**2014**	**2013**
Employee Benefit Plans:				
Balance at beginning of period	$ (398)	$ (18)	$ (419)	$ (18)
Other comprehensive income before reclassifications	–	–	–	–
Amounts reclassified from AOCI	10	–	31	–
Net current period other comprehensive income	10	–	31	–
Balance at end of period	$ (388)	$ (18)	$ (388)	$ (18)

Reclassifications Out of Accumulated Other Comprehensive Income *(b)*

	For the three months ended September 30,		For the nine months ended September 30,		
	2014	**2013**	**2014**	**2013**	**Income Statement Line Item**
Defined Benefit Pension Plans:					
Periodic pension costs	$ (10)	$ –	$ (31)	$ –	See Note 7.
Net amounts reclassified	$ (10)	$ –	$ (31)	$ –	

(a) Amounts in parentheses indicate debits to AOCI.
(b) Amounts in parentheses indicate debits to profit/loss.

Note 6 — Fair Value Measurement

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

Accounting guidance establishes a hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the hierarchy tiers is based upon the lowest level of input that is significant to the fair value measurement.

Estimating the fair value of the Association's investment in the Bank and Other Farm Credit Institutions is not practicable because the stock is not traded. The net investment is a requirement of borrowing from the Bank and is carried at cost plus allocated equities in the accompanying Consolidated Balance Sheets.

The classifications within the fair value hierarchy are as follows:

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets. Level 2 inputs include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability.

Level 3 inputs are unobservable and supported by little or no market activity. Valuation is determined using pricing models, discounted cash flow methodologies, or similar techniques, and could include significant management judgment or estimation. Level 3 assets and liabilities also could include instruments whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

For a complete discussion of the inputs and other assumptions considered in assigning various assets and liabilities to the fair value hierarchy levels, see the latest Annual Report to Shareholders.

There were no Level 3 assets and liabilities measured at fair value on a recurring basis for the periods presented. The Association had no transfers of assets or liabilities into or out of Level 1 or Level 2 during the periods presented.

SENSITIVITY TO CHANGES IN SIGNIFICANT UNOBSERVABLE INPUTS

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a change to another unobservable input (that is, changes in certain inputs are interrelated with one another), which may counteract or magnify the fair value impact.

Investment Securities

The fair values of predominantly all Level 3 investment securities have consistent inputs, valuation techniques and correlation to changes in underlying inputs. The models used to determine fair value for these instruments use certain significant unobservable inputs within a discounted cash flow or market comparable pricing valuation technique. Such inputs generally include discount rate components including risk premiums, prepayment estimates, default estimates and loss severities.

These Level 3 assets would decrease (increase) in value based upon an increase (decrease) in discount rates, defaults, or loss severities. Conversely, the fair value of these assets would generally increase (decrease) in value if the prepayment input were to increase (decrease).

Generally, a change in the assumption used for defaults is accompanied by a directionally similar change in the risk premium component of the discount rate (specifically, the portion related to credit risk) and a directionally opposite change in the assumption used for prepayments. Unobservable inputs for loss severities do not normally increase or decrease based on movements in the other significant unobservable inputs for these Level 3 assets.

Inputs to Valuation Techniques

Management determines the Association's valuation policies and procedures. The Bank performs the majority of the Association's valuations, and its valuation processes are calibrated annually by an independent consultant. The fair value measurements are analyzed on a quarterly basis. For other valuations, documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing that is available.

Quoted market prices are generally not available for the instruments presented below. Accordingly fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Quantitative Information about Recurring and Nonrecurring Level 3 Fair Value Measurements

	Fair Value	Valuation Technique(s)	Unobservable Input	Range
Impaired loans and other property owned	$ 19,271	Appraisal	Income and expense	*
			Comparable sales	*
			Replacement cost	*
			Comparability adjustments	*

** Ranges for this type of input are not useful because each collateral property is unique.*

Information about Other Financial Instrument Fair Value Measurements

	Valuation Technique(s)	Input
Cash	Carrying Value	Par/Principal and appropriate interest yield
Loans	Discounted cash flow	Prepayment forecasts Probability of default Loss severity
Investment securities, held-to-maturity	Vendor priced	
Notes payable to AgFirst Farm Credit Bank	Discounted cash flow	Prepayment forecasts Probability of default Loss severity

** *The inputs used to estimate fair value for assets and liabilities that are obtained from third party vendors are not included in the table as the specific inputs applied are not provided by the vendor.*

The following tables present the carrying amounts and fair values of assets and liabilities that are measured at fair value on a recurring and nonrecurring basis, as well as those financial instruments not measured at fair value, for each of the hierarchy levels at the period ended:

	At or for the Nine Months Ended September 30, 2014					
	Total Carrying Amount	Level 1	Level 2	Level 3	Total Fair Value	Fair Value Effects On Earnings
Recurring Measurements						
Assets:						
Assets held in Trust funds	$ 259	$ 259	$ –	$ –	$ 259

Note 7 — Employee Benefit Plans

The following is a table of retirement and other postretirement benefit expenses for the Association:

	For the three months ended September 30,		For the nine months ended September 30,	
	2014	2013	2014	2013
Pension	$ 304	$ 286	$ 910	$ 857
401(k)	44	43	159	144
Other postretirement benefits	50	45	150	136
Total	$ 398	$ 374	$ 1,219	$ 1,137

The following is a table of retirement and other postretirement benefit contributions for the Association:

	Actual YTD Through 9/30/14	Projected Contributions For Remainder of 2014	Projected Total Contributions 2014
Pension	$ 16	$ 891	$ 907
Other postretirement benefits	123	49	172
Total	$ 139	$ 940	$ 1,079

Contributions in the above table include allocated estimates of funding for multi-employer plans in which the Association participates. These amounts may change when a total funding amount and allocation is determined by the respective Plan's Sponsor Committee. Also, market conditions could impact discount rates and return on plan assets which could change contributions necessary before the next plan measurement date of December 31, 2014.

Further details regarding employee benefit plans are contained in the 2013 Annual Report to Shareholders.

In May 2014, the AgFirst Plan Sponsor Committee voted to approve changes to certain employee benefit plans as follows:

(1) On January 1, 2015, the AgFirst Farm Credit Cash Balance Retirement Plan (Cash Balance Plan) will be frozen, employer contributions will cease, and the Cash Balance Plan will be closed to new entrants.
(2) In lieu of participation in and contributions to the Cash Balance Plan, additional employer contributions will be made to the Farm Credit Benefits Alliance 401(k) Plan.

The above changes are expected to become officially executed plan amendments in November 2014. The Cash Balance Plan will not be terminated on January 1, 2015, but is expected to be terminated in 2015 or 2016 once all necessary actions have been performed and approvals obtained. Participants in the Cash Balance Plan will continue to receive employer contributions to their hypothetical cash balance accounts through the end of 2014, at which time contributions will cease. Participants will continue receiving interest credits on the same basis as currently being provided until the Cash Balance Plan is terminated. Participants who are not already fully vested in their accounts will automatically become 100 percent vested on December 31, 2014. Following the termination of the Cash Balance Plan, vested benefits will be distributed to participants.

Beginning on January 1, 2015, for participants in the Cash Balance Plan and eligible employees hired on or after this date, an additional employer contribution will be made to the Farm Credit Benefits Alliance 401(k) Plan equal to 3 percent of the participants' eligible compensation.

Accounting related to the curtailment of future benefit service under the Cash Balance Plan, as prescribed in ASC 715 "Compensation – Retirement Benefits", is expected to be triggered in November 2014 when the plan amendments are officially executed. This accounting is not expected to have a material impact on the Association's financial condition or results of operations.

Note 8 — Commitments and Contingent Liabilities

From time to time, legal actions are pending against the Association in which claims for money damages are asserted. On at least a quarterly basis, the Association assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. While the outcome of legal proceedings is inherently uncertain, on the basis of information presently available, management, after consultation with legal counsel, is of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the Association. Because it is not probable that the Association will incur a loss or the loss is not estimable, no liability has been recorded for any claims that may be pending.

Note 9 — Subsequent Events

The Association has evaluated subsequent events and has determined that, except as described below, there are none requiring disclosure through November 7, 2014, which is the date the financial statements were issued.

On October 20, 2014, AgFirst's Board of Directors declared a special patronage distribution to be paid on January 1, 2015. The Association will receive approximately $4,187 which will be recorded in October 2014 as patronage refunds from other Farm Credit institutions.
