Report on Internal Control Over Financial Reporting

The Association’s principal executives and principal financial officers, or persons performing similar functions, are responsible for establishing and maintaining adequate internal control over financial reporting for the Association’s Consolidated Financial Statements. For purposes of this report, “internal control over financial reporting” is defined as a process designed by, or under the supervision of the Association’s principal executives and principal financial officers, or persons performing similar functions, and effected by its Board of Directors, management and other personnel. This process provides reasonable assurance regarding the reliability of financial reporting information and the preparation of the Consolidated Financial Statements for external purposes in accordance with accounting principles generally accepted in the United States of America.

Internal control over financial reporting includes those policies and procedures that: (1) pertain to the maintenance of records that in reasonable detail accurately and fairly reflect the transactions and dispositions of the assets of the Association, (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial information in accordance with accounting principles generally accepted in the United States of America, and that receipts and expenditures are being made only in accordance with authorizations of management and directors of the Association, and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the Association’s assets that could have a material effect on its Consolidated Financial Statements.

The Association’s management has completed an assessment of the effectiveness of internal control over financial reporting as of June 30, 2015. In making the assessment, management used the framework in *Internal Control — Integrated Framework (2013)*, promulgated by the Committee of Sponsoring Organizations of the Treadway Commission, commonly referred to as the “COSO” criteria.

Based on the assessment performed, the Association’s management concluded that as of June 30, 2015, the internal control over financial reporting was effective based upon the COSO criteria. Additionally, based on this assessment, the Association’s management determined that there were no material weaknesses in the internal control over financial reporting as of June 30, 2015.

Management's Discussion and Analysis of Financial Condition and Results of Operations

(dollars in thousands)

The following commentary reviews the financial condition and results of operations of Farm Credit of Central Florida, ACA, (Association) for the period ended June 30, 2015. These comments should be read in conjunction with the accompanying financial statements, notes to the financial statements and the 2014 Annual Report of the Association. The accompanying consolidated financial statements were prepared under the oversight of the Audit Committee of the Board of Directors.

LOAN PORTFOLIO

The Association provides funds to farmers, rural homeowners and farm-related businesses for financing of short and intermediate-term loans and long-term real estate mortgage loans. The Association's loan portfolio is diversified over a range of agricultural commodities in our region, including horticulture, fruits/vegetables, citrus, and cattle. Farm size varies and many of the borrowers in the region have diversified farming operations. This factor, along with the numerous opportunities for non-farm income in the area, reduces the level of dependency on a given commodity.

June 30, 2015 compared to December 31, 2014

Loan volume of the Association as of June 30, 2015, was \$393,475, a decrease of \$5,942 as compared to \$399,417 at December 31, 2014. Net loans outstanding at June 30, 2015, were \$384,850 as compared to \$390,180 at December 31, 2014. The Association has investment securities that are classified as held to maturity in the amount of \$28,084 at June 30, 2015, as compared to \$31,756 at December 31, 2014. Net loans and investment securities accounted for 96.05 percent of total assets at June 30, 2015, as compared to 94.66 percent of total assets at December 31, 2014.

The Association's total servicing portfolio has decreased to \$904,518 as compared to \$913,521 at December 31, 2014, due in large part to run-off and liquidations exceeding new money closings since year-end. The decrease in net loan volume is primarily due to seasonal lending. The short-term portfolio, which is heavily influenced by operating loans, normally reaches a peak balance between October and December and declines between January and June as strawberry and other winter vegetable growers pay down their loans using proceeds from the sale of their crops. The result of this normal seasonal lending

activity causes net loan volume to decrease on revolving credit lines.

June 30, 2015 compared to June 30, 2014

Loan volume of the Association as of June 30, 2015, was \$393,475, an increase of \$25,720 as compared to \$367,755 at June 30, 2014. Net loans outstanding at June 30, 2015, were \$384,850 as compared to \$360,585 at June 30, 2014. The Association has investment securities that are classified as held to maturity in the amount of \$28,084 at June 30, 2015, as compared to \$35,524 at June 30, 2014. Net loans and investment securities accounted for 96.05 percent of total assets at June 30, 2015, as compared to 95.69 percent of total assets at June 30, 2014.

The Association's total servicing portfolio has increased to \$904,518 as compared to \$841,763 at June 30, 2014, due to new money closings exceeding run-off and or liquidations over the past twelve months.

ASSET QUALITY AND LOAN LOSS RESERVES

There is an inherent risk in the extension of any type of credit. Portfolio credit quality as a percent of loan volume has declined slightly as compared to year end as a result of the decreased loan volume since year-end even though substandard asset volume has actually decreased in this same time period. Acceptable and OAEM credit quality as a percentage of total loan portfolio was 92.40% as of June 30, 2015, compared to 92.50% at December 31, 2014 and 90.86% at June 30, 2014. Substandard credit quality was 7.6% as of June 30, 2015, compared to 7.50% at December 31, 2014. The actual substandard asset volume has decreased by \$35 from year-end December 31, 2014. Nonaccrual loan volume was \$7,686 at June 30, 2015, compared to \$7,886 at December 31, 2014 and \$7,358 at June 30, 2014, a decrease of \$200 and an increase of \$328, respectively. The majority of the loan assets in nonaccrual are in the nursery, citrus and cattle industries.

Association management maintains an allowance for loan losses in an amount considered sufficient to absorb possible losses in the loan portfolio based on current and expected future conditions. The allowance for loan losses at June 30, 2015, was \$8,625 compared to \$9,237 at December 31, 2014, and \$7,170 at June 30, 2014, and is considered by management to be adequate to cover possible losses. The allowance for loan loss is broken down between specific reserves assigned to an individual loan and general reserves which are available for the possible losses

within the entire portfolio. The current allowance for loan loss at June 30, 2015, contains \$3,912 in specific reserves and \$4,713 in general reserves. The following outlines the allowance for loan loss activity as of June 30, 2015.

Allowance for Loan Losses Activity:	YTD 2015
Balance at beginning of period	\$ 9,237
Charge-offs	(6)
Recoveries	132
Provisions/(Reversals)-General	(134)
Provisions/(Reversals)-Specifics	(604)
Balance at end of period	<u>\$ 8,625</u>

The decrease in allowance for loan losses compared to December 2014 was a direct result of allowance reversals during 2015 within the citrus, cattle and real estate portfolios. The reversals are due to improved asset quality since December 2014. Chargeoffs are funded through the allowance from previous and/or current increases in the provision for loan losses.

RESULTS OF OPERATIONS

For the three months ended June 30, 2015

Net income for the three months ended June 30, 2015, totaled \$1,879, as compared to \$2,274 for the same period in 2014. The decrease of \$395 for the period is associated directly with decreased patronage refunds from other Farm Credit institutions as well as no gains on sales of other property owned as compared to a \$256 gain in the same period prior year.

Net interest income decreased \$25 for the three months ended June 30, 2015, as compared to the same period in 2014. The primary reason for the decrease in net interest income is the decrease in interest rate spreads as compared to the same time last year. Net interest income for the three months ending June 30, 2015, is shown in the following table:

Net Interest Income	For the three months ended June 30,			
	2015	2014	\$ change	% change
Investment Interest Income	\$ 137	\$ 171	\$ (34)	(19.88)%
Loan Interest Income	4,287	4,176	111	2.66
Total Interest Income	4,424	4,347	77	1.77
Total Interest Expense	1,680	1,578	102	6.46
Net Interest Income	<u>\$ 2,744</u>	<u>\$ 2,769</u>	<u>\$ (25)</u>	<u>(0.90)%</u>

Allowance for loan loss activity for the quarter consisted of a \$393 reversal as compared to a \$460 reversal for the same period last year. Provisions for loan losses for the three months ending June 30, 2015 are shown in the following table:

Provisions/(Reversals) for Loan Losses	For the three months ended June 30,			
	2015	2014	\$ change	% change
General Reserves	\$ (239)	\$ (434)	\$ 195	44.93%
Specific Reserves	(154)	(26)	(128)	(492.31)
Total Provisions/(Reversals)	<u>\$ (393)</u>	<u>\$ (460)</u>	<u>\$ 67</u>	<u>14.57%</u>

Noninterest income for the three months ended June 30, 2015, totaled \$1,344, as compared to \$1,372 for the same period of 2014, a decrease of \$28. The decrease is primarily the result of decreased patronage refunds from other Farm Credit institutions. Patronage refunds from other Farm Credit institutions decreased from the prior year due to lower patronage earnings from the Participation and Capitalized Participation Pools as a result of decrease loan volume within the pools. Noninterest income for the three months ending June 30, 2015, is shown in the following table:

Noninterest Income	For the three months ended June 30,			
	2015	2014	\$ change	% change
Loan fees	\$ 79	\$ 56	\$ 23	41.07%
Fees for financially related services	117	45	72	160.00
Patronage refunds from other				
Farm Credit Institutions	1,061	1,231	(170)	(13.81)
Gains (losses) on sales of rural				
home loans, net	81	34	47	138.24
Gains (losses) on other transactions	3	5	(2)	(40.00)
Other noninterest income	3	1	2	200.00
Total noninterest income	<u>\$ 1,344</u>	<u>\$ 1,372</u>	<u>\$ (28)</u>	<u>(2.04)%</u>

Noninterest expense for the three months ended June 30, 2015, increased \$277 compared to the same period of 2014, primarily due to decreased gains on sales of other property owned. Insurance Fund Premium expenses also increased due to higher loan volumes coupled with an increase in the premium rate which result in higher premium expenses. The Farm Credit System Insurance Corporation (FCSIC) has set the premium to 13 basis points (compared to 12 basis points during 2014) on adjusted insured debt outstanding with an additional 10 basis point premium on the average principal outstanding of nonaccrual loans. Noninterest expense for the three months ending June 30, 2015 is shown in the following table:

Noninterest Expense	For the three months ended June 30,			
	2015	2014	\$ change	% change
Salary and employee benefits	\$ 1,841	\$ 1,838	\$ 3	0.16 %
Occupancy and equipment	161	153	8	5.23
Insurance Fund Premium	97	86	11	12.79
(Gains) losses on other				
property owned, net	-	(256)	256	100.00
Other operating expenses	503	504	(1)	0.20
Total noninterest expense	<u>\$ 2,602</u>	<u>\$ 2,325</u>	<u>\$ 277</u>	<u>11.91 %</u>

For the six months ended June 30, 2015

Net income for the six months ended June 30, 2015, totaled \$3,826 as compared to \$4,130 for the same period in 2014. The decrease of \$304 for the period is associated with increased non interest expense from the same period prior year.

Net interest income decreased \$82 or 1.47% for the six months ended June 30, 2015, as compared to the same period in 2014. The primary reason for the decrease in net interest income is higher loan volume from prior year offset by declined interest rate spreads and declined investment volume. Net interest income for the six months ending June 30, 2014 is shown in the following table:

Net Interest Income	For the six months ended June 30,			
	2015	2014	\$ change	% change
Investment Interest Income	\$ 278	\$ 373	\$ (95)	(25.47)%
Loan Interest Income	8,555	8,345	210	2.52
Total Interest Income	8,833	8,718	115	1.32
Total Interest Expense	3,352	3,155	197	6.24
Net Interest Income	\$ 5,481	\$ 5,563	\$ (82)	(1.47)%

The effects of changes in average volume and interest rates on net interest income over the past six months are presented in the following table:

Change in Net Interest Income:	Non-				
	Volume	Rate	accrual	Amortization	Total
	(dollars in thousands)				
Change in NII	\$ 182	\$ (315)	13	\$ 38	\$ (82)

Allowance for loan loss activity consisted of a \$738 reversal, as compared to a \$460 reversal for the same period last year. The reversal was due mostly to the decrease in nonaccrual loan volumes coupled with improved credit quality. Provisions for loan losses for the six months ending June 30, 2015 are shown in the following table:

Provisions for Loan Losses	For the six months ended June 30,			
	2015	2014	\$ change	% change
General Reserves	\$ (134)	\$ (487)	\$ 353	72.48 %
Specific Reserves	(604)	27	(631)	(2337.04)
Total Provisions/(Reversals)	\$ (738)	\$ (460)	\$ (278)	(60.43) %

Noninterest income for the six months ended June 30, 2015, totaled \$2,719, as compared to \$2,849 for the same period of 2014, a decrease of \$130. The decrease is primarily the result of decreased patronage refunds from other Farm Credit Institutions. Patronage refunds from other Farm Credit Institutions decreased from the prior year due to lower patronage earnings from the Participation Pool and Capitalized Participation Pool (CPP) as a

result of decreased loan volume within the pools. Noninterest income for the six months ending June 30, 2015 is shown in the following table:

Noninterest Income	For the six months ended June 30,			
	2015	2014	\$ change	% change
Loan fees	\$ 148	\$ 121	\$ 27	22.31%
Fees for financially related services	121	45	76	168.89
Patronage refunds from other				
Farm Credit institutions	2,308	2,597	(289)	(11.13)
Gains (losses) on sales of rural home loans, net	91	34	57	167.65
Gains (losses) on other Transactions	7	9	(2)	(22.22)
Other noninterest income	44	43	1	2.33
Total noninterest income	\$ 2,719	\$ 2,849	\$ (130)	(4.56)%

Noninterest expense for the six months ended June 30, 2015 increased \$372 compared to the same period of 2014. The primary reason for the increase was due to no gains on the sale of other property owned as opposed to a \$205 gain in the same period last year. Salaries and employee benefits increased \$87 during the period due to increased health insurance and retirement costs. Other operating expenses increased \$50 from the same period last year as a result of increased controllable costs such as training and nonaccrual expenses. Insurance Fund Premium expenses increased due to the Farm Credit System Insurance Corporation (FCSIC) adjusting the premium to 13 basis points (compared to 12 basis points during 2014) on adjusted insured debt outstanding with an additional 10 basis point premium on the average principal outstanding of nonaccrual loans. Noninterest expense for the six months ending June 30, 2015 is shown in the following table:

Noninterest Expense	For the six months ended June 30,			
	2015	2014	\$ change	% change
Salary and employee benefits	\$ 3,533	\$ 3,446	\$ 87	2.52%
Occupancy and equipment	323	315	8	2.54
Insurance Fund Premium	194	172	22	12.79
(Gains) losses on other property owned, net	—	(205)	205	100.0
Other operating expenses	1,062	1,012	50	4.94
Total noninterest expense	\$ 5,112	\$ 4,740	\$ 372	7.85%

FUNDING SOURCES

The principal source of funds for the Association is the borrowing relationship established with the Bank through a General Financing Agreement. The General Financing Agreement utilizes the Association's credit and fiscal performance as criteria for establishing a line of credit on which the Association may draw funds. The funds are advanced by the Bank to the Association in the form of notes payable. The notes payable are segmented into variable rate and fixed rate sections.

The variable rate note is utilized by the Association to fund variable rate loan advances and operating funds requirements. The fixed rate note is used specifically to fund fixed rate loan advances made by the Association. The total notes payable to the Bank at June 30, 2015, was \$331,821 as compared to \$344,844 at December 31, 2014. The decrease is attributable to pay downs on loans received during the normal course of business being greater than borrowings to fund new loan advances.

CAPITAL RESOURCES

Total members' equity at June 30, 2015, increased to \$92,340 from the December 31, 2014, total of \$88,504. The increase is primarily attributed to the increase in unallocated surplus resulting from net income.

Total capital stock and participation certificates were \$848 on June 30, 2015, compared to \$860 on December 31, 2014. This decrease is attributed to the retirement of stock and participation certificates on loans liquidated in the normal course of business.

Farm Credit Administration regulations require all Farm Credit institutions to maintain minimum permanent capital, total surplus and core surplus ratios. These ratios are calculated by dividing the Association's permanent capital, total surplus and core surplus as defined in FCA regulations, by a risk-adjusted asset base. As of June 30, 2015, the Association's total surplus ratio and core surplus ratio were 21.00 percent and 19.02 percent, respectively, and the permanent capital ratio was 21.22 percent. All three ratios were well above the minimum regulatory ratios of 7.00 percent for permanent capital and total surplus ratios and 3.50 percent for the core surplus ratio.

REGULATORY MATTERS

On July 25, 2014, the FCA published a proposed rule in the Federal Register to revise the requirements governing the eligibility of investments for System banks and associations. The public comment period ended on October 23, 2014. The stated objectives of the proposed rule are as follows:

- To strengthen the safety and soundness of System banks and associations.
- To ensure that System banks hold sufficient liquidity to continue operations and pay maturing obligations in the event of market disruption.
- To enhance the ability of the System banks to supply credit to agricultural and aquatic producers.
- To comply with the requirements of section 939A of the Dodd-Frank Wall Street Reform and Consumer Protection Act (Dodd-Frank Act).
- To modernize the investment eligibility criteria for System banks.
- To revise the investment regulation for System associations to improve their investment management practices so they are more resilient to risk.

On September 4, 2014, the FCA published a proposed rule in the Federal Register to modify the regulatory capital requirements for System banks and associations. The initial public comment period ended on February 16, 2015. On June 15, 2015, the Farm Credit Administration reopened the comment period from June 26 to July 10, 2015. The stated objectives of the proposed rule are as follows:

- To modernize capital requirements while ensuring that institutions continue to hold sufficient regulatory capital to fulfill their mission as a government-sponsored enterprise.
- To ensure that the System's capital requirements are comparable to the Basel III framework and the standardized approach that the federal banking regulatory agencies have adopted, but also to ensure that the rules recognize the cooperative structure and the organization of the System.
- To make System regulatory capital requirements more transparent.
- To meet the requirements of section 939A of the Dodd-Frank Act.

FINANCIAL REGULATORY REFORM

See discussion of the Dodd-Frank Act in the Financial Regulatory Reform section of the Association's 2014 Annual Report.

RECENTLY ISSUED ACCOUNTING PRONOUNCEMENTS

Please refer to Note 1, "*Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements*", in the Notes to the Financial Statements, and the 2014 Annual Report to Shareholders for recently issued accounting pronouncements.

NOTE: Shareholder investment in the Association is materially affected by the financial condition and results of operations of AgFirst Farm Credit Bank. Copies of AgFirst's annual and quarterly reports are available upon request free of charge by calling 1-800-845-1745, ext. 2832, or writing Susanne Caughman, AgFirst Farm Credit Bank, P.O. Box 1499, Columbia, SC 29202. Information concerning AgFirst Farm Credit Bank can also be obtained at their website, www.agfirst.com. Copies of the Association's annual and quarterly reports are also available upon request free of charge by calling 1-800-533-2773, or writing D. Scott Fontenot, CFO, Farm Credit of Central Florida, ACA, P.O. Box 8009, Lakeland, FL 33802, or accessing the website, www.farmcreditfl.com. The Association prepares a quarterly report within 40 days after the end of each fiscal quarter, except that no report need be prepared for the fiscal quarter that coincides with the end of the fiscal year of the institution.

The accompanying notes are an integral part of these consolidated financial statements.

Farm Credit of Central Florida, ACA

Notes to the Consolidated Financial Statements

(dollars in thousands, except as noted)

(unaudited)

Note 1 — Organization, Significant Accounting Policies, and Recently Issued Accounting Pronouncements

Organization

The accompanying financial statements include the accounts of Farm Credit of Central Florida, ACA (the Association). A description of the organization and operations, the significant accounting policies followed, and the financial condition and results of operations for the Association as of and for the year ended December 31, 2014, are contained in the 2014 Annual Report to Shareholders. These unaudited interim consolidated financial statements should be read in conjunction with the latest Annual Report to Shareholders.

Basis of Presentation

In the opinion of management, the accompanying consolidated financial statements contain all adjustments necessary for a fair statement of results for the periods presented. These adjustments are of a normal recurring nature, unless otherwise disclosed.

Certain amounts in the prior period's consolidated financial statements may have been reclassified to conform to the current period presentation. Such reclassifications had no effect on the prior period net income or total capital as previously reported.

The results of any interim period are not necessarily indicative of those to be expected for a full year.

Significant Accounting Policies

The Association's accounting and reporting policies conform with U.S. generally accepted accounting principles (GAAP) and practices in the financial services industry. To prepare the financial statements in conformity with GAAP, management must make estimates based on assumptions about future economic and market conditions (for example, unemployment, market liquidity, real estate prices, etc.) that affect the reported amounts of assets and liabilities at the date of the financial statements, income and expenses during the reporting period, and the related disclosures. Although these estimates contemplate current conditions and expectations of change in the future, it is reasonably possible that actual conditions may be different than anticipated, which could materially affect results of operations and financial condition.

Management has made significant estimates in several areas, including loans and allowance for loan losses (Note 2, *Loans and Allowance for Loan Losses*), investment securities and other-than-temporary impairment (Note 3, *Investments*), and financial instruments (Note 6, *Fair Value Measurement*). Actual results could differ from those estimates.

For further details of significant accounting policies, see Note 2, *Summary of Significant Accounting Policies*, from the latest Annual Report.

Accounting Standards Updates (ASUs) Issued During the Period

The following ASUs were issued by the Financial Accounting Standards Board (FASB) since the most recent Annual Report:

- 2015-10 Technical Corrections and Improvements – In June, 2015, the FASB issued ASU 2015-10, Technical Corrections and Improvements (numerous Topics). The amendments in the Update represent changes to make minor corrections or minor improvements to the Codification that are not expected to have a significant effect on current accounting practice or create a significant administrative cost to most entities. The amendments that require transition guidance are effective for all entities for fiscal years, and interim periods within those fiscal years, beginning after December 15, 2015. Early adoption is permitted, including adoption in an interim period. All other amendments were effective upon the issuance of the Update.
- 2015-07 Fair Value Measurement – In May, 2015, the FASB issued ASU 2015-07, Fair Value Measurement (Topic 820): Disclosures for Investments in Certain Entities That Calculate Net Asset Value per Share (or Its Equivalent). Topic 820 permits a reporting entity, as a practical expedient, to measure the fair value of certain investments using the net asset value per share of the investment. Currently, investments valued using the practical expedient are categorized within the fair value hierarchy on the basis of whether the investment is redeemable with the investee at net asset value on the measurement date, never redeemable with the investee at net asset value, or redeemable with the investee at net asset value at a future date. To address diversity in practice related to how certain investments measured at net asset value with future redemption dates are categorized, the amendments in this Update remove the requirement to categorize investments for which fair values are measured using the net asset value per share practical expedient. It also limits disclosures to investments for which the entity has elected to measure the fair value using the practical expedient. For public business entities, the guidance is effective for fiscal years beginning after December 15, 2015, and interim periods within those fiscal years.

For all other entities, the guidance is effective for fiscal years beginning after December 15, 2016, and interim periods within those fiscal years. Earlier application is permitted. The guidance is to be applied retrospectively to all periods presented. Application of this guidance is not expected to have an impact on the Association's financial condition or results of operations, but will require modifications to footnote disclosures.

ASUs Pending Effective Date

For a detailed description of the ASUs below, see the latest Annual Report.

Potential effects of ASUs issued in previous periods:

- 2014-09 Revenue from Contracts with Customers – On July 9, 2015, the FASB voted to delay the effective date by one year. A final ASU reflecting the revised effective date will be issued in third quarter of 2015.

Accounting Standards Effective During the Period

There were no changes in the accounting principles applied from the latest Annual Report, other than any discussed below.

No recently adopted accounting guidance issued by the FASB had a significant effect on the current period reporting. See the most recent Annual Report for a detailed description of each of the standards below:

- 2014-14 Classification of Certain Government-Guaranteed Mortgage Loans – The Association did not have a significant amount of loans that met the criteria of the guidance.

- 2014-11 Repurchase-to-Maturity Transactions – The Association did not have a significant amount of transactions that met the criteria of the guidance.
- 2014-08 Discontinued Operations – The Association has not had and does not anticipate any significant disposals.
- 2014-04 Reclassification of Consumer Mortgage Loans – The criteria of the standard were not significantly different from the Association's policy in place at adoption. The amendment was adopted prospectively. See Note 2, *Loans and Allowance for Loan Losses*, for the additional disclosures required by this guidance.

Note 2 — Loans and Allowance for Loan Losses

The Association maintains an allowance for loan losses at a level considered adequate by management to provide for probable and estimable losses inherent in the loan portfolio as of the report date. The allowance for loan losses is increased through provisions for loan losses and loan recoveries and is decreased through loan charge-offs and allowance reversals. A review of individual loans in each respective portfolio is performed periodically to determine the appropriateness of risk ratings and to ensure loss exposure to the Association has been identified. See Note 3, *Loans and Allowance for Loan Losses*, from the latest Annual Report for further discussion.

Credit risk arises from the potential inability of an obligor to meet its repayment obligation. The Association manages credit risk associated with lending activities through an assessment of the credit risk profile of an individual obligor. The Association sets its own underwriting standards and lending policies that provide direction to loan officers and are approved by the board of directors.

A summary of loans outstanding at period end follows:

	June 30, 2015	December 31, 2014
Real estate mortgage	\$ 168,946	\$ 166,190
Production and intermediate-term	138,864	163,254
Loans to cooperatives	6,355	6,843
Processing and marketing	41,008	33,077
Farm-related business	20,220	11,897
Communication	5,353	3,603
Energy and water/waste disposal	1,908	1,909
Rural residential real estate	10,821	12,644
Total Loans	<u>\$ 393,475</u>	<u>\$ 399,417</u>

A substantial portion of the Association's lending activities is collateralized, and exposure to credit loss associated with lending activities is reduced accordingly.

The Association may purchase or sell participation interests with other parties in order to diversify risk, manage loan volume, and comply with Farm Credit Administration (FCA) regulations. The following tables present participation loan balances at periods ended:

June 30, 2015

	Within AgFirst District		Within Farm Credit System		Outside Farm Credit System		Total

*Includes the loan types; Loans to cooperatives, Processing and marketing, and Farm-related business.

A restructuring of a debt constitutes a troubled debt restructuring (TDR) if the creditor for economic or legal reasons related to the debtor's financial difficulties grants a concession to the debtor that it would not otherwise consider. There were no TDRs that occurred during the three and six month periods ended June 30, 2014.

Outstanding Recorded Investment	Three Months Ended June 30, 2015					Charge-offs
	Interest Concessions	Principal Concessions	Other Concessions	Total		
Pre-modification:						
Production and intermediate-term	\$ -	\$ 90	\$ -	\$ 90		
Total	\$ -	\$ 90	\$ -	\$ 90		
Post-modification:						
Production and intermediate-term	\$ -	\$ 91	\$ -	\$ 91	\$ -	
Total	\$ -	\$ 91	\$ -	\$ 91	\$ -	

Outstanding Recorded Investment	Six Months Ended June 30, 2015					Charge-offs
	Interest Concessions	Principal Concessions	Other Concessions	Total		
Pre-modification:						
Production and intermediate-term	\$ -	\$ 2,306	\$ -	\$ 2,306		
Total	\$ -	\$ 2,306	\$ -	\$ 2,306		
Post-modification:						
Production and intermediate-term	\$ -	\$ 2,308	\$ -	\$ 2,308	\$ -	
Total	\$ -	\$ 2,308	\$ -	\$ 2,308	\$ -	

Interest concessions may include interest forgiveness and interest deferment. Principal concessions may include principal forgiveness, principal deferment, and maturity extension. Other concessions may include additional compensation received which might be in the form of cash or other assets.

The following table presents outstanding recorded investment for TDRs that occurred during the previous twelve months and for which there was a subsequent payment default during the period. Payment default is defined as a payment that was thirty days or more past due.

Defaulted troubled debt restructurings:	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Real estate mortgage	\$ -	\$ 40	\$ -	\$ 80
Production and intermediate-term	-	-	-	191
Total	\$ -	\$ 40	\$ -	\$ 271

The following table provides information at period end on outstanding loans restructured in troubled debt restructurings. These loans are included as impaired loans in the impaired loan table:

	Total TDRs		Nonaccrual TDRs	
	June 30, 2015	December 31, 2014	June 30, 2015	December 31, 2014
Real estate mortgage	\$ 6,638	\$ 7,991	\$ 864	\$ 1,052
Production and intermediate-term	10,218	7,676	3,617	1,923
Rural residential real estate	1,321	1,348	837	659
Total Loans	\$ 18,177	\$ 17,015	\$ 5,318	\$ 3,634
Additional commitments to lend	\$ -	\$ -		

The following table presents information as of period end:

	June 30, 2015
Carrying amount of foreclosed residential real estate properties held as a result of obtaining physical possession	\$ -
Recorded investment of consumer mortgage loans secured by residential real estate for which formal foreclosure proceedings are in process	\$ 339

Note 3 — Investments

Investment Securities

The Association's investments consist primarily of asset-backed securities (ABSs). These ABSs are issued through the Small Business Administration and are guaranteed by the full faith and credit of the United States government. They are held for managing short-term surplus funds and reducing interest rate risk. These securities meet the applicable FCA regulatory guidelines related to government agency guaranteed investments.

A summary of the amortized cost and fair value of investment securities held-to-maturity follows:

		June 30, 2015				
		Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield
ABSs		\$ 28,084	\$ 662	\$ (41)	\$ 28,705	1.91%

		December 31, 2014				
		Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Fair Value	Yield
ABSs		\$ 31,756	\$ 731	\$ (48)	\$ 32,439	2.07%

A summary of the contractual maturity, amortized cost and estimated fair value of investment securities held-to-maturity follows:

		June 30, 2015		
		Amortized Cost	Fair Value	Weighted Average Yield
In one year or less		\$ 117	\$ 117	2.16%
After one year through five years		23,599	24,079	1.84
After five years through ten years		4,368	4,509	2.25
After ten years		—	—	—
Total		\$ 28,084	\$ 28,705	1.91%

Expected maturities for these types of securities can differ from contractual maturities because borrowers may have the right to prepay obligations with or without prepayment penalties.

An investment is considered impaired if its fair value is less than its cost. The following tables show the fair value and gross unrealized losses for investments that were in a continuous unrealized loss position aggregated by investment category at each reporting period. A continuous unrealized loss position for an investment is measured from the date the impairment was first identified.

		June 30, 2015			
		Less than 12 Months		12 Months or Greater	
		Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
ABSs		\$ 1,171	\$ (16)	\$ 1,195	\$ (25)

		December 31, 2014			
		Less than 12 Months		12 Months or Greater	
		Fair Value	Unrealized Losses	Fair Value	Unrealized Losses
ABSs		\$ 1,621	\$ (11)	\$ 1,523	\$ (37)

The recording of an impairment is predicated on: (1) whether or not management intends to sell the security, (2) whether it is more likely than not that management would be required to sell the security before recovering its costs, and (3) whether management expects to recover the security's entire amortized cost basis (even if there is no intention to sell). If the Association intends to sell the security or it is more likely than not that it would be required to sell the security, the impairment loss equals the full difference between amortized cost and fair value of the security. When the Association does not intend to sell securities in an unrealized loss position and it is not more likely than not that it would be required to sell the securities, other-than-temporary impairment loss is separated into credit loss and non-credit loss. Credit loss is defined as the shortfall of the present value of the cash flows expected to be collected in relation to the amortized cost basis.

The Association performs periodic credit reviews, including other-than-temporary impairment analyses, on its investment securities portfolio. The objective is to quantify future possible loss of principal or interest due on securities in the portfolio. Factors considered in determining whether an impairment is other-than-temporary include among others: (1) the length of time and the extent to which the fair value is less than cost, (2) adverse conditions specifically related to the industry, (3) geographic area and the condition of the underlying collateral, (4) payment structure of the security, (5) ratings by rating agencies, (6) the credit worthiness of bond insurers, and (7) volatility of the fair value changes.

The Association uses the present value of cash flows expected to be collected from each debt security to determine the amount of credit loss. This technique requires assumptions related to the underlying collateral, including default rates, amount and timing of prepayments, and loss severity. Assumptions can vary widely from security to security and are influenced by such factors as loan interest rate, geographical location of the borrower, borrower characteristics, and collateral type.

Significant inputs used to estimate the amount of credit loss include, but are not limited to, performance indicators of the underlying assets in the security (including default rates, delinquency rates, and percentage of nonperforming assets), loan-to-collateral value ratios, third-party guarantees, current levels of subordination, vintage, geographic concentration, and credit ratings. The Association may obtain assumptions for the default rate, prepayment rate, and loss severity rate from an independent third party, or generate the assumptions internally.

The Association has not recognized any credit losses as any impairments were deemed temporary and resulted from non-credit related factors. The Association has the ability and intent

to hold these temporarily impaired investments until a recovery of unrealized losses occurs, which may be at maturity, and at this time expects to collect the full principal amount and interest due on these securities, especially after considering credit enhancements.

Substantially all of these investments were in U. S. government agency securities and the Association expects these securities would not be settled at a price less than their amortized cost. All securities continue to perform at period end.

Investments in other Farm Credit Institutions

The Association is required to maintain ownership in AgFirst Farm Credit Bank (AgFirst or the Bank) of Class B and Class C stock as determined by the Bank. The Bank may require additional capital contributions to maintain its capital requirements. The Association owns 2.42 percent of the issued stock of the Bank as of June 30, 2015 net of any reciprocal

investment. As of that date, the Bank's assets totaled \$28.8 billion and shareholders' equity totaled \$2.4 billion. The Bank's earnings were \$168 million for the first six months of 2015. In addition, the Association has an investment of \$289 related to other Farm Credit institutions.

Note 4 — Debt

Notes Payable to AgFirst Farm Credit Bank

The Association's indebtedness to the Bank represents borrowings by the Association to fund its earning assets. This indebtedness is collateralized by a pledge of substantially all of the Association's assets. The contractual terms of the revolving line of credit are contained in the General Financing Agreement (GFA). The GFA also defines Association performance criteria for borrowing from the Bank, which includes borrowing base margin, earnings and capital covenants, among others.

Note 5 — Members' Equity

Accumulated Other Comprehensive Income (AOCI)

	Changes in Accumulated Other Comprehensive Income by Component (a)			
	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Employee Benefit Plans:				
Balance at beginning of period	\$ (454)	\$ (409)	\$ (465)	\$ (419)
Other comprehensive income before reclassifications	-	-	-	-
Amounts reclassified from AOCI	11	11	22	21
Net current period other comprehensive income	11	11	22	21
Balance at end of period	\$ (443)	\$ (398)	\$ (443)	\$ (398)

	Reclassifications Out of Accumulated Other Comprehensive Income (b)				
	Three Months Ended June 30,		Six Months Ended June 30,		Income Statement Line Item
	2015	2014	2015	2014	
Defined Benefit Pension Plans:					
Periodic pension costs	\$ (11)	\$ (11)	\$ (22)	\$ (21)	See Note 7.
Net amounts reclassified	\$ (11)	\$ (11)	\$ (22)	\$ (21)	

(a) Amounts in parentheses indicate debits to AOCI.

(b) Amounts in parentheses indicate debits to profit/loss.

Note 6 — Fair Value Measurement

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability in an orderly transaction between market participants in the principal or most advantageous market for the asset or liability.

Accounting guidance establishes a hierarchy for disclosure of fair value measurements to maximize the use of observable inputs, that is, inputs that reflect the assumptions market participants would use in pricing an asset or liability based on market data obtained from sources independent of the reporting entity. The hierarchy is based upon the transparency of inputs to the valuation of an asset or liability as of the measurement date. A financial instrument's categorization within the hierarchy tiers is based upon the lowest level of input that is significant to the fair value measurement.

The classifications within the fair value hierarchy are as follows:

Level 1 inputs to the valuation methodology are unadjusted quoted prices for identical assets or liabilities in active markets.

Level 2 inputs include quoted prices for similar assets and liabilities in active markets; quoted prices in markets that are not active; and inputs that are observable, or can be corroborated, for substantially the full term of the asset or liability.

Level 3 inputs are unobservable and supported by little or no market activity. Valuation is determined using pricing models, discounted cash flow methodologies, or similar techniques, and could include significant management judgment or estimation. Level 3 assets and liabilities also could include instruments whose price has been adjusted based on dealer quoted pricing that is different than the third-party valuation or internal model pricing.

For a complete discussion of the inputs and other assumptions considered in assigning various assets and liabilities to the fair value hierarchy levels, see the latest Annual Report to Shareholders.

There were no Level 3 assets or liabilities measured at fair value on a recurring basis for the periods presented. The Association had no transfers of assets or liabilities into or out of Level 1 or Level 2 during the periods presented.

Fair values are estimated at each period end date for assets and liabilities measured at fair value on a recurring basis. Fair values are estimated at least annually, or when information suggests a significant change in value, for assets measured at fair value on a nonrecurring basis. Other Financial Instruments are not measured at fair value in the statement of financial position, but their fair values are estimated as of each period end date. The following tables summarize the carrying amounts of these assets and liabilities at period end, and their related fair values.

At or for the Six Months Ended June 30, 2015						
Total Carrying Amount	Level 1	Level 2	Level 3	Total Fair Value	Fair Value Effects On Earnings	
Recurring Measurements						
Assets:						
Assets held in Trust funds	\$ 346	\$ 346	\$ -	\$ -	\$ 346

SENSITIVITY TO CHANGES IN SIGNIFICANT UNOBSERVABLE INPUTS

Discounted cash flow or similar modeling techniques are generally used to determine the recurring fair value measurements for Level 3 assets and liabilities. Use of these techniques requires determination of relevant inputs and assumptions, some of which represent significant unobservable inputs as indicated in the tables that follow. Accordingly, changes in these unobservable inputs may have a significant impact on fair value.

Certain of these unobservable inputs will (in isolation) have a directionally consistent impact on the fair value of the instrument for a given change in that input. Alternatively, the fair value of the instrument may move in an opposite direction for a given change in another input. Where multiple inputs are used within the valuation technique of an asset or liability, a change in one input in a certain direction may be offset by an opposite change in another input having a potentially muted impact to the overall fair value of that particular instrument. Additionally, a change in one unobservable input may result in a

change to another unobservable input (that is, changes in certain inputs are interrelated with one another), which may counteract or magnify the fair value impact.

Inputs to Valuation Techniques

Management determines the Association’s valuation policies and procedures. The Bank performs the majority of the Association’s valuations, and its valuation processes are calibrated annually by an independent consultant. The fair value measurements are analyzed on a quarterly basis. For other valuations, documentation is obtained for third party information, such as pricing, and periodically evaluated alongside internal information and pricing that is available.

Quoted market prices are generally not available for the instruments presented below. Accordingly fair values are based on judgments regarding anticipated cash flows, future expected loss experience, current economic conditions, risk characteristics of various financial instruments, and other factors. These estimates involve uncertainties and matters of judgment, and therefore cannot be determined with precision. Changes in assumptions could significantly affect the estimates.

Quantitative Information about Recurring and Nonrecurring Level 3 Fair Value Measurements

	Fair Value	Valuation Technique(s)	Unobservable Input	Range
Impaired loans and other property owned	\$ 16,633	Appraisal	Income and expense	*
			Comparable sales	*
			Replacement cost	*
			Comparability adjustments	*

* Ranges for this type of input are not useful because each collateral property is unique.

Information about Other Financial Instrument Fair Value Measurements

	Valuation Technique(s)	Input
Cash	Carrying Value	Par/Principal and appropriate interest yield
Loans	Discounted cash flow	Prepayment forecasts
		Probability of default
		Loss severity
Investment securities, held-to-maturity	Discounted cash flow	Prepayment rates
		Risk adjusted discount rate
Notes payable to AgFirst Farm Credit Bank	Discounted cash flow	Prepayment forecasts
		Probability of default
		Loss severity

Note 7 — Employee Benefit Plans

The following is a table of retirement and other postretirement benefit expenses for the Association:

	Three Months Ended June 30,		Six Months Ended June 30,	
	2015	2014	2015	2014
Pension	\$ 288	\$ 303	\$ 576	\$ 606
401(k)	63	45	175	115
Other postretirement benefits	82	50	163	100
Total	\$ 433	\$ 398	\$ 914	\$ 821

The following is a table of retirement and other postretirement benefit contributions for the Association:

	Actual YTD Through 6/30/15	Projected Contributions For Remainder of 2015	Projected Total Contributions 2015
Pension	\$ 11	\$ 1,096	\$ 1,107
Other postretirement benefits	88	95	183
Total	\$ 99	\$ 1,191	\$ 1,290

Contributions in the above table include allocated estimates of funding for multi-employer plans in which the Association participates. These amounts may change when a total funding amount and allocation is determined by the respective Plan’s Sponsor Committee. Also, market conditions could impact discount rates and return on plan assets which could change contributions necessary before the next plan measurement date of December 31, 2015.

Further details regarding employee benefit plans are contained in the 2014 Annual Report to Shareholders, including a discussion of benefit plan changes related to the termination of the AgFirst Farm Credit Cash Balance Retirement Plan.

Note 8 — Commitments and Contingent Liabilities

From time to time, legal actions are pending against the Association in which claims for money damages are asserted. On at least a quarterly basis, the Association assesses its liabilities and contingencies in connection with outstanding legal proceedings utilizing the latest information available. While the outcome of legal proceedings is inherently uncertain, on the basis of information presently available, management, after consultation with legal counsel, is of the opinion that the ultimate liability, if any, from these actions, would not be material in relation to the financial position of the Association. Because it is not probable that the Association will incur a loss or the loss is not estimable, no liability has been recorded for any claims that may be pending.

Note 9 — Subsequent Events

The Association evaluated subsequent events and determined there were none requiring disclosure through August 7, 2015, which was the date the financial statements were issued.
